TOUGH ENOUGH TO TAKE IT...

Introducing the ICE BULL automatic ice prevention system by Control Devices. Built to stand up to the harsh temperatures and physical punishment of livestock watering tanks during winter, the ICE BULL thermo-activated winter water station valve delivers low-maintenance durability you can count on.

Engineered to automatically open when water temperatures drop below 42°F, our design-tested valve opens to allow warm water to flow into the tank and prevents ice formation by creating movement on the water’s surface and raising the water temperature. The valve automatically shuts off once the water in the tank has warmed sufficiently.

Install ICE BULL on your watering tanks this winter for a hassle-free solution to ice buildup.

ICE BULL  
RMB25 & RMB25-1 (KIT)

Materials. Brass, Stainless Steel, Buna-N Seals
Max Inlet Pressure. 100 psi
Flow Rate. 2 Gallons Per Minute
Valve Actuation. 42°F
Inlet. 1/4” NPT Female
Outlet. 1/8” NPT Female
Kit Includes. Ice Bull, 1/4” x 1/8” NPT Brass Elbow, 1/8” NPT 1/4” Hose Barb, 12” Length 1/4” Diameter Flexible Rubber Hose
